

# MedixMDx qRT-PCR Lyo ready mix

Catalog no. MX6102

## Lyophilization ready universal one-step probe mix

### A master mix ready to be lyophilized

- Antibody-regulated hot-start Taq polymerase and reverse transcriptase
- Addition of target-specific primers and probes, and RTase Lyo
- Ready to be freeze-dried without any additional excipients

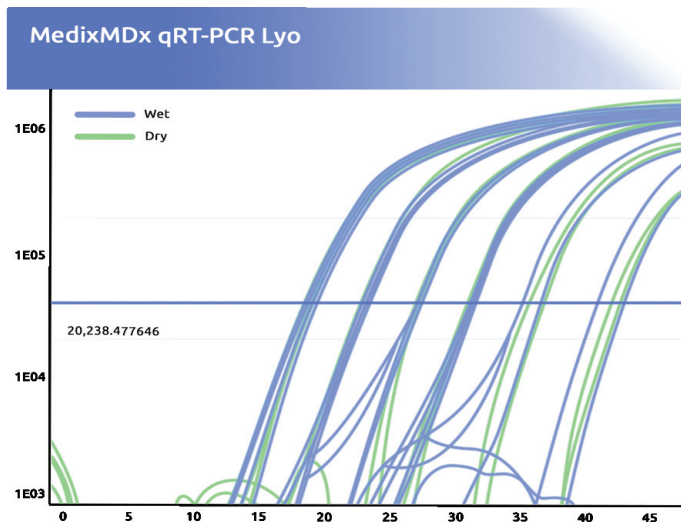

### Robust, sensitive, and fast RT-qPCR

- Rapid detection and quantification of a variety of RNA templates, such as mRNA, viral RNA, and total RNA
- Developed and optimized for detection of multiplexed viral targets direct from human patient samples

Pack size:

#MX6102-5, 500 rxn

#MX6102-100, 10 000 rxn

### RT-qPCR amplification profiles and standard curve of human FLUAV target.

- **Blue** "wet" MedixMDx qRT-PCR Lyo ready mix
- **Green** rehydrated lyophilized "dry" MedixMDx qRT-PCR Lyo ready mix
