Medix Biochemica

Anti-h SCC 11804 SPTN-5

Product overview							
Catalog number	100879						
Specificity	Antibody recognizes human squamous cell carcinoma (SCC) antigen						
Description	Monoclonal mouse antibody, cultured <i>in vitro</i> under conditions free from animal-derived components.						
Product buffer solution	50 mM Na-citrate, pH 6.0, 0.9% NaCl, 0.095% NaN $_3$ as a preservative						
Shelf life and storage	Unspecified, storage at 2–8 °C						
Subclass	lgG1						
Analyte description	Squamous cell carcinoma (SCC) antigen is a biomarker of squamous cell carcinomas found in the lung, uterine cervix, esophagus, head, neck, anal canal, and skin. In clinical applications SCC antigen levels are measured from serum or plasma to monitor recurrence of the tumor and response to the therapy. This marker is not recommended for screening, since SCC antigen levels may also increase in non-malignant diseases including severe inflammatory diseases, psoriasis, and renal failure.						
Parameters tested on each lot							
Product appearance	Liquid, may turn slightly opaque during storage						
Product concentration	5.0 mg/ml (+/- 10 %)						
Immunoreactivity	80–120 % compared to the reference sample in an FIA test						
IEF Profile	6.7–7.2						
Purity	≥ 95 %						
Kinetic parameters							
Association rate constant	Not Determined (N/D)						
Dissociation rate constant	N/D						
Affinity constant	N/D						
Determination method	-						
Determination antigen	-
